GABRIEL LOEWINGER

gabeloewinger.com | gloewinger@g.harvard.edu | (202) 215 – 4719 | github.com/gloewing

EDUCATION

Harvard University — Boston, MA
Ph.D., Biostatistics — Expected: May 2022
- NIH Doctoral Fellowship Recipient (NRSA: F31)

Pitzer College — Claremont, CA
B.A., Neuroscience with Honors. GPA: 3.9/4.0 — May 2012

RESEARCH INTERESTS

- Statistics, Machine Learning, Applied Optimization, Neuroscience, Chemical Dependence

HONORS, FELLOWSHIPS AND GRANTS

- Harvard Medical School Computational Neuroscience Symposium Best Abstract Award — Oct 2020
- NIH Doctoral Fellowship: National Research Service Award Fellowship (F31) — Aug 2020
- Rose Fellowship, Harvard School of Public Health — Nov 2019
- NIH Technical Intramural Research Training Award — Feb 2015
- Fulbright Research Fellowship — May 2013
- Watson Fellowship — May 2012
- Pitzer College Research Travel Award — Sep 2010, 2011
- Amgen Scholarship (UCLA) — Mar 2011
- Claremont Colleges Summer Neuroscience Research Fellowship — Mar 2011

PUBLICATIONS AND MANUSCRIPTS

Loewinger G, Acosta R, Mazumder R, Parmigiani, G. Optimal Ensemble Construction for Multi-Study Prediction with Applications to COVID-19 Excess Mortality Estimation. *arXiv:2109.09164*.

Loewinger G, Patil P, Kishida K, Parmigiani G. Hierarchical resampling for bagging in multi-study prediction with applications to human neurochemical sensing. *bioRxiv:856385*. Submitted 2nd round of review at *Annals of Applied Statistics*.

Rush B, Marcus O, García S, Loizaga-Velder A, **Loewinger G**, Spitalier A, Mendive F (2021). Protocol for Outcome Evaluation of Ayahuasca-Assisted Addiction Treatment: The Case of Takiwasi Center. *Frontiers in Pharmacology, 12*.

Márquez I, **Loewinger G**, Vargas J, López J, Díaz E, Esber G (2021). Surprise-induced enhancements in the associability of Pavlovian cues facilitate learning across behavior systems. *Under Review*.

Augustin S, **Loewinger G**, O'Neal T, Kravitz A, Lovinger D (2020). Dopamine D2 receptor signaling on iMSNs is required for initiation and vigor of learned actions. *Neuropsychopharmacology*. 45, 2087–2097.

Johnson K, Voyvodic L, **Loewinger G**, Mateo Y, Lovinger D (2020). Operant self-stimulation of thalamic terminals in the dorsomedial striatum is constrained by metabotropic glutamate receptor 2. *Neuropsychopharmacology*. 45, 1454–1462.

Loewinger G, Sharma B, Karki D, Khatiwoda P, Kainee S, Poudel K (2016). Low knowledge and perceived Hepatitis C risk despite high risk behaviour among injection drug users in Kathmandu, Nepal. *The International Journal of Drug Policy*. 33:75-82.

Loewinger G, Oleson E, Cheer J (2013). Using dopamine research to generate rational cannabinoid drug policy. *Drug Testing and Analysis*. 5(1):22-26.

Wassum K, Ostlund S, **Loewinger G**, Maidment N (2013). Phasic Mesolimbic Dopamine Release Tracks Reward Seeking During Expression of Pavlovian-to-Instrumental Transfer. *Biological Psychiatry*. 73(8):747-755.

Loewinger G, Beckert M, Tejeda H, Cheer J (2011). Methamphetamine-induced dopamine terminal deficits in the nucleus accumbens are exacerbated by reward-associated cues and attenuated by CB1 receptor antagonism. *Neuropharmacology.* 62(7):2192-2201.

OPEN-SOURCE SOFTWARE

***studyStrap* | CRAN Package**
- Sole developer of the *studyStrap* R package, freely available on CRAN, which implements numerous machine learning methods for training prediction algorithms with multiple training datasets
- 7,000+ downloads

SELECTED RESEARCH EXPERIENCE

Harvard School of Public Health Boston, MA
Graduate Researcher May 2018-Present
- Advised by Professor Giovanni Parmigiani and collaborated with thesis committee members, Professors Rahul Mazumder (MIT) and Rajarshi Mukherjee (Harvard)
- Developed machine learning methods for integration of multiple datasets to improve prediction performance
- Developed domain adaptation ensemble methods for large dataset prediction problems using hierarchical resampling techniques with applications to human neurochemical concentration prediction
- Developed nonlinear optimization-based methods for transfer learning with applications to estimation of COVID-19 excess mortality
- Developed interpretable methods for high dimensional, sparse regression problems using integer optimization
- Spearheaded collaborations, served as sole statistician on 3 neuroscience projects and 1 observational study

National Institutes of Health (NIAAA) | Laboratory of Dr. David Lovinger Bethesda, MD
Postbaccalaureate IRTA Research Fellow Feb 2015-June 2017
- Proposed, designed and conducted an experiment to study dopamine activity in decision making
- Wrote extensive Python code to analyze neurochemical and behavioral data
- Conducted applied statistical analyses (e.g., principal component analysis and linear mixed effects models)

Thomas J. Watson Fellowship Peru, Brazil, Thailand, Vietnam
Research Fellow Aug 2012-July 2013
- Traveled alone and conducted qualitative research on alternative treatments for chemical dependence
- Established research contacts in international settings and conducted participant interviews in 3 languages

Fulbright Fellowship Kathmandu, Nepal
Research Fellow Aug 2013-Oct 2014
- Designed research methodology and questionnaire for study of HIV risk among drug users
- Secured funding from the United Nations Office on Drugs and Crime
- Hired, trained and led 3 researchers, using Nepali language skills, to conduct over 700 participant interviews
- Conducted extensive statistical analysis of survey response data (e.g., generalized linear models)
- Wrote and submitted final research report to the United Nations Office on Drugs and Crime

Colleges Behavioral Health Research Claremont, CA
Researcher Sep 2010-May 2012
- Proposed, designed and conducted a study on alcohol policy and student drinking behavior
- Secured funding from Dean of Students offices at Pitzer and Harvey Mudd Colleges
- Collected ~500 surveys and analyzed results with structural equation modeling
- Research resulted in policy changes at Pitzer college through addition of a Good Samaritan clause

UCLA, Semel Institute | Laboratory of Dr. Nigel Maidment Los Angeles, CA
Summer Research Fellow May 2011-Aug 2011
- Ran behavioral and in vivo fast-scan cyclic voltammetry experiments
- Conducted extensive neurochemical and behavioral data analysis with structural equation modeling

University of Maryland, School of Medicine | Laboratory of Dr. Joe Cheer Baltimore, MD
Researcher Aug 2009-Jan 2010

- Proposed, designed and conducted a study assessing methamphetamine neurotoxicity in rats
- Conducted extensive applied statistical analysis of neurochemical and behavioral data (e.g., linear mixed effects models)

University of Maryland, School of Medicine | Laboratory of Dr. Geoffery Schoenbaum Baltimore, MD
Research Assistant May 2009-Aug 2009

- Assisted with behavioral pharmacology experiments in rats

TEACHING

Harvard School of Public Health Boston, MA
Graduate Teaching Assistant May 2018-Present

- **Introductory Statistics for Medical Research**
  - One of 7 teaching assistants for a master's level biostatistics course of ~160 students. Taught sessions on R programming and graded exams
- **Statistics for Medical Research II**
  - One of 5 teaching assistants for a master's level biostatistics course of ~110 students. Taught sessions on R programming and graded homework
- **Practice and Culminating Experience for Quantitative Methods**
  - The only teaching assistant for a master's level biostatistics course of ~35 students. Advised students on statistical components of their capstone research project
- **Consulting Seminar**
  - The only teaching assistant for a doctoral level biostatistics course of ~5 students. Graded homework
- **Applied Regression Analysis**
  - One of 3 teaching assistants for a master's level biostatistics course of ~60 students. Taught weekly section of ~20 students, held weekly office hours and graded homework and exams

RESEARCH TALKS

Applied Statistics Talk: ***Extracting Latent Neural Time Series Signals: Phasic and Tonic Components of Fiber Photometry Data***
Graduate Student Seminar Series, Harvard Biostatistics Apr 2021

Doctoral Thesis Research: ***Machine Learning Methods for In Vivo Neurochemical Estimation***
Read Montague Lab, Virginia Tech **|** *Invited Talk* May 2019
Summer Student Research Symposium, Harvard Biostatistics Aug 2018

NIH IRTA Fellowship Research: ***Accumbal dopamine transients are valence-dependent***
David Lovinger Lab Meeting Presentation May 2016, 2017

Fulbright Pre-Departure Orientation: ***Conducting Research in South Asia***
Fulbight Conference, Washington, DC **|** *Invited Talk* Jun 2015

Fulbright Research: ***The Association Between Drug Rehabilitation Attendance and Hepatitis C Risk Behavior***
Martin Chautari, Social Science Center, Kathmandu, Nepal Sep 2014
Fulbright Commission, Kathmandu, Nepal Aug 2014
South and Central Asia Fulbright Research Conference, Chennai, India Feb 2014

Watson Research: ***Alternative Treatments for Chemical Dependence***
Returning Fellows' Conference, Amherst, MA Aug 2013

Undergraduate Thesis Research: ***Phasic Mesolimbic Dopamine Release is Associated with Pavlovian Cue-Induced Potentiation of Instrumental Activity***
Keck Science Center, Claremont, CA Sep 2011

POSTERS

Loewinger G, Patil P, Mazumder R, Kishida K, Parmigiani G. Multi-Study Machine Learning Methods for In Vivo Estimation of Dopamine in Humans (2020). *Brigham Health/Harvard Medical School Computational Data Neuroscience Symposium*.

Loewinger G, Esber G, Caprioli D, Mateo Y, Lovinger D (2016). Dopamine at indifference: Accumbal dopamine transients are valence-dependent. *Society for Neuroscience Meeting*.

Loewinger G, Wassum K, Ostlund S, Maidment N (2011). Mesolimbic Dopamine Release is Associated With Pavlovian Cue-Induced Stimulation of Instrumental Activity. *Keck Science Center Thesis Poster Session*.

Loewinger G, Wassum K, Ostlund S, Maidment N (2011). Mesolimbic Dopamine Release is Associated With Pavlovian Cue-Induced Stimulation of Instrumental Activity. *Amgen Scholars Poster Session*.

Wassum K, Ostlund S, **Loewinger G,** Maidment N (2011). Phasic dopamine signaling during Pavlovian to instrumental transfer. *Society for Neuroscience Meeting*.

Beckert M, **Loewinger G,** Tejeda H, Bernstein D, Cheer J (2010). Endocannabinoid modulation of methamphetamine neurotoxicity. *Society for Neuroscience Meeting*.

COMMUNITY AND CAMPUS INVOLVEMENT

Harvard Biostatistics Entering Student Mentor May 2021-Present
- Mentored entering doctoral student

Harvard Biostatistics Multi-Study Learning Journal Club Jan 2021-Present
- Established weekly journal club focused on domain generalization and domain adaptation

Harvard Biostatistics HIV Working Group Co-Organizer Sep 2019-May 2020
- Organized weekly working group seminar series: selected and invited speakers

Pitzer College Neuroscience Club Cofounder Sep 2011-May 2012
- Secured club funding advised new students on the neuroscience major

Claremont Colleges Brazilian Jiu Jitsu Club Cofounder Sep 2011- May 2012
- Secured funding to provide students free access to a local academy's Brazilian Jiu Jitsu classes
- Taught weekly classes on campus

SKILLS

- **Programming:** *R* (4.5 yrs. experience), *Python* (2 yrs. experience), *Julia* (2 yrs. experience)
- **Relevant Software and Computing:** *LaTex*, High Performance Computing Cluster (4.5 yrs experience)
- **Applied Statistical Modeling:** Extensive applied statistical experience with
    - Cross-sectional (e.g., generalized linear models)
    - Longitudinal (e.g., generalized estimating equations, generalized linear mixed models)
    - Time series (e.g., Gaussian processes, splines)
    - Survival analyses
- **Optimization:** Extensive experience with applied linear, non-linear, and mixed-inter optimization using *Julia JuMP* and *CVXR* with open-source as well as commercial optimization solvers (e.g., *Gurobi*, *MOSEK*)
- **Languages:** Nepali (advanced), Spanish (intermediate), Portuguese (intermediate)
- **Interests:** Brazilian Jiu Jitsu, Chess, Vipassana Meditation

RELEVANT COURSEWORK

Harvard University and MIT
- Statistical Methods I-II, Statistical Inference, Probability, Advanced Regression and Statistical Learning, Machine Learning, Analysis of Multivariate and Longitudinal Data, Bayesian Methodology, Dimension Reduction, Introduction to Epidemiology, Social and Biological Networks, Machine Learning through a Modern Optimization Lens, Advanced Optimization, Nonlinear Optimization
