GABRIEL LOEWINGER

Washington, DC | gloewinger@gmail.com gabeloewinger.com | github.com/gloewing | linkedin.com/in/gabrielloewinger

EDUCATION

Harvard University Boston, MA Ph.D., Biostatistics May 2022

National Institutes of Health PhD Fellowship (NRSA: F31)

Pitzer College Claremont, CA **B.A.**, Neuroscience with Honors May 2012

SELECTED RESEARCH & TEACHING EXPERIENCE

National Institutes of Health

Machine Learning Research Scientist

• Develop causal inference and functional data analysis statistical/ML methods and open-source software

• Consult with neuroscientists, psychiatrists, and mental health research on machine learning and statistics applications

Harvard University, Department of Biostatistics

Boston, MA

Bethesda, MD

Aug 2022-Present

Graduate Researcher & Teaching Assistant

August 2017-Present

- Create mixed-integer optimization-based methods for interpretable, high dimensional, sparse multi-task learning
- Develop nonlinear optimization-based transfer learning method to integrate multiple datasets
- Create ensemble domain adaptation method to improve prediction accuracy of high dimensional, neuroscience datasets
- Serve as teaching assistant for 4 graduate-level statistics courses

National Institutes of Health

Bethesda, MD

Postbaccalaureate IRTA Research Fellow

Feb 2015-July 2017

- Proposed, designed and conducted a study on dopamine activity in decision-making using electrochemical techniques
- Wrote extensive Python code to analyze data and conducted statistical analyses (e.g., PCA, mixed effects modeling)
- Built data preprocessing and statistical analysis pipelines in Python and R for postdoctoral fellows

Fulbright Fellowship

Research Fellow

Kathmandu, Nepal

Aug 2012-July 2013

Research Fellow Aug 2013-Nov 2014

- Designed research methodology and questionnaire for study of HIV risk among drug users
- Hired, trained and led 3 researchers, using Nepali language skills, to conduct over 700 participant interviews
- Conducted extensive statistical analysis of survey response data (e.g., generalized linear models)
- Secured funding from and submitted final research report to the United Nations Office on Drugs and Crime

Thomas J. Watson Fellowship

Peru, Brazil, Thailand, Vietnam

- Conducted qualitative research on international treatments for chemical dependence
- Established research contacts in international settings and conducted participant interviews in 3 languages

SELECTED AWARDS, FELLOWSHIPS & GRANTS

 Teaching Award, Department of Biostatistics, Harvard University 	May 2022
 Best Abstract Award, Harvard Medical School Computational Data Neuroscience Symposium 	Oct 2020
• National Institutes of Health (NIDA) PhD Fellowship: National Research Service Award (F31)	Aug 2020
 Rose Fellowship, Harvard School of Public Health 	Nov 2019
 National Institutes of Health Technical Intramural Research Training Award 	Feb 2015
Fulbright Research Fellowship	May 2013
Thomas J. Watson Fellowship	May 2012
Amgen Scholarship	Mar 2011
 Claremont Colleges Summer Neuroscience Research Fellowship 	Mar 2011

OPEN-SOURCE SOFTWARE

fastFMM | CRAN Package

- Co-developed the *fastFMM* R (CRAN) package, which implements functional mixed models with general random effects
- Package has over 4,100 downloads

sMTL | CRAN Package

- Co-developed the Sparse Multi-Task Learning package using Mixed Integer Optimization in R (CRAN) and Julia
- Package has over 4,000 downloads and was named one of R View's "Top 40" New R Packages, February 2023

studyStrap | CRAN Package

- Developed the *studyStrap* R (CRAN) package, which implements domain generalization machine learning methods
- Package has over 14,400 downloads and was named one of R View's "Top 40" New R Packages, February 2020

RELEVANT COURSEWORK

Harvard University and MIT

• Statistical Methods I-II, Statistical Inference, Probability, Advanced Regression and Statistical Learning, Machine Learning, Analysis of Multivariate and Longitudinal Data, Bayesian Methodology, Dimension Reduction, Machine Learning through a Modern Optimization Lens, Advanced Optimization, Nonlinear Optimization

SKILLS

- Relevant Software and Computing: R, Python, Julia, LaTex, High Performance Computing Cluster (Bash)
- Applied Statistics: Causal Inference, Functional Data Analysis, Multivariate/Longitudinal, Transfer Learning
- Optimization: Linear, Non-Linear, and Mixed-Integer Optimization with Julia JuMP, Gurobi, MOSEK, CVXR
- Languages: Nepali (advanced), Spanish (intermediate), Portuguese (intermediate)
- Interests: Brazilian Jiu Jitsu, Chess, Vipassana Meditation
